PROFILE INFO

Full-Stack Web & Mobile Developer with a foundation built through academic projects, internships, and freelance work. Skilled in Laravel, Vue.js, ReactJS, Firebase, MySQL, and mobile technologies such as React Native and Android Studio. I develop scalable, user-friendly applications following clean architecture principles. Currently pursuing an Engineering Degree in Software Engineering, and have developed and presented multiple end-to-end systems that address real-world challenges.

- Arabic (Fluent)
- English (Intermediate)
- French (Beginner)
- German (Beginner)

WORK EXPERIENCE

Freelance

2023 - Present

Mzlouafi, Casablanca (Technopark)

- Developed and delivered custom web and mobile application solutions, leveraging frameworks like Laravel, React.js, and Vue.js.
- Designed and implemented responsive user interfaces and integrated RESTful APIs for seamless functionality.
- Optimized performance and maintained high-quality code for scalability and reliability.

Internship

June-July 2024

Technofy, Casablanca

- Worked with a team on projects including PowerUp and Welk'Home, focusing on full-stack development.
- Concurrently developed my academic project SkillSpire using Laravel and Vue.js as part of my studies.

Internship

April 2023

Mzlouafi, Casablanca (Technopark)

- Worked on client platforms including BuyFollowers and AlGamers, using Laravel, MySQL, and third-party APIs.
- Collaborated with a team to debug and enhance application performance, ensuring high standards of quality.

TECHNICAL SKILLS

Web Development : *HTML, CSS, Bootstrap, Javascript, React.js, Redux, Vue.js, Pinia, PHP, Laravel, NodeJS, Express.js, Firebase, RESTful APIs, Postman, Docker, Git...*

Mobile Development : *React Native, Expo, Flutter, Android Studio*

Databases : *MySQL, MongoDB, Firebase Cloud Firestore*

PROJECTS

- **SkillSpire** - *Laravel, Vue.js, Pinia, MySQL*

A comprehensive training center management platform supporting course enrollment, scheduling, and secure payment. Built with a modular architecture and role-based access for admins, trainers, and participants.

- **WatchWander** - *React, Firebase, TMDB API*

A movie discovery platform inspired by IMDb, allowing users to explore and track their favorite movies, series, and anime. Features include user authentication, favorites, commenting system, episode tracking, and TMDB API integration.

- **AlGamers** - *Laravel, MySQL, Secure Payment Gateways*

A digital marketplace for gaming top-ups, gift cards, and vouchers. Designed for performance and security, with features like real-time order handling, payment protection, and a 3D slider UI for an engaging user experience. Inspired by platforms like SEAGM and optimized for smooth navigation.

- **Get A Way (Android App)** - *Android Studio, Firebase*

A location-based travel app helping users discover nearby places. Includes authentication, favorites, and CRUD operations using real-time Firestore integration.
